

Ce Jian's work explores how reality is visually constructed. Through painting, drawing, and installation, she examines the visual techniques and models that shape our perception of the world. By engaging with technological, scientific, and cultural narratives, she questions a rationalist understanding of reality and its systems of representation.

A central concern in her practice is the tension between theory and matter, reflected in the interplay between a complex conceptual framework and the unruliness of painterly material. Within this dialogue, she discovers artistic freedom and insight. Her compositions oscillate between surface and depth, construction and distortion. Rather than narrating stories, she focuses on the fictive space and physical presence of the images themselves.

In recent years, her work has been driven by the idea of a utopian nature situated at the intersection of history and futurism, mythology and natural science, biology and robotics. This exploration has resulted in several series of semi-abstract figures depicting non-human cyborgs. Their hybrid morphology draws from both historical and contemporary sources, merging organic and technological elements into transformable composite bodies. Through her painting, she constructs fictive realities that are both analytical and speculative, while always remaining grounded in material presence.

---

简策的创作探索了现实如何被视觉化建构。通过绘画、素描和装置，她研究塑造我们对世界认知的视觉技巧与模型。借助对技术、科学和文化叙事的介入，她质疑理性主义对现实及其表征系统的理解。

她创作实践中的核心关注点是理论与物质之间的张力，这在复杂概念框架与绘画材料的不羁性之间的互动中得到体现。在这一对话中，她发现了艺术自由与洞见。她的作品在表面与深度、建构与扭曲之间来回摆动。与叙述故事不同，她专注于图像自身的虚构空间与物质存在感。

近年来，简策的创作受到乌托邦式自然理念的驱动，这一理念位于历史与未来主义、神话与自然科学、生物学与机器人学的交汇处。这一探索产生了数个半抽象人物系列，描绘非人类的赛博格。它们的混合形态汲取历史与当代的来源，将有机与技术元素融合为可变的复合身体。通过绘画，她构建了既具分析性又具推测性的虚构现实，同时始终保持扎根于物质存在感。

## CV

- 1984 Born in Jinan/Shandong, China
- 1988 Moved to Germany
- 2006-07 Goldsmiths College, University of London, UK
- 2008 Meisterschüler degree in fine art, Berlin University of the Arts (UdK)
